

CA Workload Automation ESP Edition Foundations: Understanding Applications 200

EDUCATION COURSE DESCRIPTION

SUPPORTED PRODUCT RELEASES

CA Workload Automation ESP
Edition Version 12.0

COURSE TYPE, LENGTH, & CODE

- WBT
- 15 minutes
- 06ESP20020

WHO SHOULD ATTEND

- Administrators and Operators who work with applications in CA Workload Automation ESP Edition

RELATED COURSES

- CA Workload Automation Workstation for ESP Overview: Workload Editor 100 (06ESP10060)
- CA Workload Automation ESP Edition Foundations: Understanding Procedures 200 (06ESP20030)
- CA Workload Automation ESP Edition Foundations: Customizing Applications 200 (06ESP20060)

Course Overview

Hosted on z Systems™, CA Workload Automation ESP Edition (CA WA ESP Edition) utilizes an object-oriented architecture to reduce and simplify scheduling definitions. Operations and application development teams can easily define schedules and calendars once and reuse them many times.

This course is designed to provide the next generation CA WA ESP Edition users with a high-level understanding of how applications are defined and processed.

This Course Will Show You How To:

- Explain the relationship between procedures and applications.
- Understand how application control-level statements determine when an application runs.
- Describe the concept of application generation.
- Identify the information that an application requires to run successfully.
