Course Overview

As IT organizations propagate applications that span mobile-to-mainframe environments, having reliable tools that drive quality in developing and maintaining associated software assets becomes key to retaining and growing business.

CA InterTest for CICS helps you deliver quality applications quickly and can improve CICS stability by preventing errors before they occur. Designed to provide you with automated, reliable, and cost-effective mainframe testing tools, this product helps ensure that programs are well tested before they go into production.

This course is designed for programmers who test, debug, and fine-tune IBM CICS Transaction Server applications written in COBOL, Programming Language One (PL/I), Assembler, and Language Environment. It will show you how to apply various commands and features used to debug programs.

This Course Will Show You How To:

- Apply the COMPOSITE and CALLTRACE commands
- Apply the data monitoring feature
- Apply the CORE and STORAGE commands
- Apply the file feature
