Course Overview

CA InterTest Batch helps you deliver quality applications quickly and can improve application stability by preventing errors before they occur. Designed to provide you with automated, reliable, and cost-effective mainframe testing tools, this product helps ensure that programs are well tested before they go into production.

This course is designed for programmers who test, debug, and fine-tune COBOL, Programming Language One (PL/I), and Assembler programs, as well as Information Management System/Data Communications (IMS/DC) applications and DB2 stored procedures. It will enable you to use the Foreground Debugging, understanding its capabilities, its JCL requirements, and its UI navigation.

This Course Will Show You How To:

- Describe the functions of Foreground Debugging
- Explain JCL requirements
- Navigate the Foreground Debugging Link menu and selection panels
