- Delivery Method: WBT
- Duration: 15 minutes
- 06OPS20010

### PREREQUISITES

- CA OPS/MVS Automation  
Point Overview 100

### WHO SHOULD ATTEND

- System Administrators
- System Programmers
- Operators
- IT Managers

## Course Overview

CA OPS/MVS Automation Point is a Windows-based event monitoring, system automation and staff notification component of the CA OPS/MVS® solution. It monitors mainframe systems, distributed systems and devices throughout your enterprise, enabling event correlation among the many varied systems within your corporate computing environment. Additionally, rules and scripting capabilities enable you to consolidate events and automate the systems from consolidated source. An Alert Management interface manages critical events that require human decision-making and intervention and escalate them with a policy-based notification.

This micro-learning course is designed to help you prepare for installation and install CA OPS/MVS Automation Point.

## This Course Will Show You How To:

- Prepare to install CA OPS/MVS Automation Point.
- Complete the CA OPS/MVS Automation Point server and client installation procedures.
