## Course Overview

A typical z/OS organization processes thousands of tape files daily. These files represent priceless corporate data that needs to be completely protected throughout its lifecycle. CA 1 automates day-to-day tape management while providing comprehensive protection against destruction of tape files. Apart from tape data protection it also enables library management and automation of typical z/OS organizations.

In this course, you will learn about the daily jobs that should be run to ensure CA 1 retains your tapes correctly. You will also learn how to backup and restore the TMC.

## This Course Will Show You How To:

- Describe the functions of each CA 1 daily maintenance program
- Explain parameter and control statement options for each utility
- State the requirements for backup and restoration of the TMC
