Course Overview

CA Vantage™ Storage Resource Manager (CA Vantage SRM) centrally manages complex storage environments to help ensure that critical storage assets are fully optimized, data is protected, and application outages are eliminated. Proactive, policy-based exception management automates routine manual functions to increase personnel productivity and improve service levels.

This course prepares you to join objects using Mainframe Team Center - Management interface to CA Vantage Storage Resource Manager (CA Vantage SRM).

This Course Will Show You How To:

- Describe object join and join types
- Use the wizard to create joined objects
- Delete joined objects
