- WBT
- 15 minutes
- 06VSR20100

WHO SHOULD ATTEND

- System Administrators
- System Programmers
- Operators
- IT Managers

PREREQUISITES

- Vantage™ Storage Resource Manager: Getting Started with the Mainframe Team Center - Management Interface 200
- Understanding of basic storage management concepts
- Familiarity with z/OS

Course Overview

Vantage™ Storage Resource Manager (Vantage) centrally manages complex storage environments to help ensure that critical storage assets are fully optimized, data is protected, and application outages are eliminated. Proactive, policy-based exception management automates routine manual functions to increase personnel productivity and improve service levels.

This course prepares you to use General Object Automation (GOA) in the Mainframe Team Center - Management interface to Vantage.

This Course Will Show You How To:

- Explain automation concepts.
- Describe General Object Automation (GOA).
- Use the GOA wizard to define and customize Object Automation events.
